

Dibyajyoti Pramanick

Full Stack Developer (Next.js, MERN Stack)

[+91 6291673760](tel:+916291673760) | dibyajyotipramanick0750@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Technical Skills

Languages: TypeScript, JavaScript, HTML, CSS

Frontend: Next.js, React.js, Redux Toolkit, Tailwind CSS, shadcn/ui

Backend: Node.js, Express.js, REST API Design, Authentication & Authorization (Clerk), Webhooks, Background Jobs, Security

Databases: MongoDB, Mongoose, MySQL

Tools & Platforms: Git, GitHub, Clerk, Inngest, Stripe, Razorpay

Projects

Ascend Academy – Full-Stack Learning Management System [Live](#) | [GitHub](#)

Next.js, TypeScript, Tailwind CSS, Shadcn/UI, MongoDB, Clerk Authentication, Clerk Billing, Cloudinary, React YouTube, Vercel

- Built a full-stack SaaS-style learning management platform that enables educators and content creators to create, manage, and sell online courses while providing students with a structured learning experience.
- Developed role-based access control using Clerk, allowing educators to manage courses, track enrollments, monitor revenue, and view student analytics through a dedicated dashboard.
- Implemented course purchasing, progress tracking, lesson completion, search and filtering, and protected course access to ensure only enrolled students can consume premium content.
- Built with Next.js, TypeScript, MongoDB, and Cloudinary, leveraging server components, middleware, and secure authentication to create a scalable and production-ready ed-tech application.

GlowUp – Full-Stack Social Media Platform [Live](#) | [GitHub](#)

React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Clerk, Inngest, ImageKit, Server-Sent Events (SSE), Nodemailer

- Built a full-stack social media platform that enables users to connect, share content, and engage through posts, stories, direct messaging, and professional networking features.
- Developed real-time one-to-one messaging using Server-Sent Events (SSE), delivering live chat functionality without relying on third-party real-time services.
- Implemented core social features including follow/unfollow, connection requests, likes, comments, saved posts, story sharing, user search, and media uploads with ImageKit integration.
- Integrated Clerk authentication, automated email notifications with Nodemailer, and background workflows using Inngest, while managing global application state with Redux Toolkit for a scalable user experience.

ChadGPT – Full-Stack AI Chat Application [Live](#) | [GitHub](#)

React.js, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Clerk, Inngest, Google GenAI SDK

- Built an AI-powered chat application with a clean, responsive interface and support for contextual conversations.
- Integrated Google's Gemini models with persistent chat history and multiple chat sessions stored in MongoDB.
- Implemented Clerk authentication, conversation management, Markdown rendering, and syntax-highlighted code blocks.
- Developed the application using React, TypeScript, Express, MongoDB, Redux Toolkit, and Inngest.

Education

Asutosh College, University of Calcutta (*Bachelor of Arts*)

Ideal Public School, XII (ISC)

CGPA: 6.934 (2022 - 2025)

86% (2022)
